## Summary

The City of Carbondale (“**City**”) has requested that Ruyle Hullinger & Associates, (“**Consultant**”), conduct a feasibility study “**Feasibility Study**” of the area that it intends to designate as the City of Carbondale, Illinois-University Corridor Redevelopment Project Area #2 (“**Redevelopment Project Area**”) The **City** desires to undertake the designation of the area as a redevelopment project area under Illinois Compiled Statutes at 65 ILCS 5/11/74.4-1 *et seq.* (the “**Act**”). A map of the proposed **Redevelopment Project Area** shows the boundaries of the proposed area to be studied. This Map is Attachment I and made part of this report by reference hereto.

In January 1977, the Illinois General Assembly passed the initial version of the Tax Increment Allocation Redevelopment Act. The General Assembly amended the **Act** several times and it is now codified as amended in the Illinois Compiled Statutes at 65 ILCS 5/11/74.4-1 *et seq.* The **Act** provides a means for municipalities, after the approval of an eligibility report and a redevelopment plan, designation of a **Redevelopment Project Area** and adoption of tax increment finance, to redevelop blighted redevelopment project areas and to finance redevelopment project costs with incremental property tax revenues. Incremental property taxes are derived from the increase in the current equalized assessed valuation (“**EAV**”) of real property within the redevelopment project area over and above the initial **EAV** of the real property. Any increase in **EAV** is then multiplied by the current tax rate, which results in incremental property taxes. The **Act** defines a number of eligible items that may be redevelopment project costs. Under the **Act**, incremental property taxes may pay for many of these costs. In addition, a municipality may pledge as payment additional revenues including revenues from the redevelopment project, municipal property taxes or other non-designated revenue sources, bonds backed by the general obligation of the municipality or payable solely by incremental property taxes. Tax increment financing is not designed to generate tax revenues by increasing tax rates, but rather through the temporary capture of new tax revenues generated by the increase in the **EAV** over the initial **EAV**. This increased **EAV** of property results from the municipality’s redevelopment program, improvements and activities, various development and redevelopment activities and the reassessment of properties. Under the **Act**, all taxing districts continue to receive property taxes levied on the initial **EAV** of properties within the redevelopment project area. Additionally, taxing districts can receive distributions of incremental property taxes designated by the **City** as “**surplus**” under the **Act**. This occurs when taxes received exceed principal and interest obligations for that year and expected redevelopment project expenditures necessary to implement the redevelopment plan. Taxing districts also benefit from the increased property tax base after redevelopment project costs and debt obligations related thereto are paid off.

Under the **Act** the purposes of tax increment financing are as follows: to eradicate the blighting conditions, to retain and create good jobs, to improve and add to the inventory of housing units and to make public investments that will encourage private investment to restore and enhance the tax base of the taxing districts within the area. In order to accomplish these purposes the municipality fosters a program of redevelopment projects. The community itself may undertake these redevelopment projects or may enter into partnership with private developers and contractors to undertake the redevelopment projects. In the latter case, the community may reimburse the developer or contractor or may incent the developer by means specified in the **Act** and, if from tax exempt bonding proceeds, according to

State and Federal laws governing tax exemption. Then the costs of these redevelopment projects may be paid or reimbursed from the TIF.

The proposed **Redevelopment Project Area** is characterized by the **City** as an area of the **City** that is endangered by the presence of blighting factors that impairs the value of private investments and threatens the sound growth and the tax base of taxing districts in the area. Should the community designate the area as a **Redevelopment Project Area**; the **City** will create a redevelopment plan and project as specified in the Act to address the above problems.

As noted, if the **City** desires to use tax increment financing to undertake projects identified in the redevelopment plan and project it must qualify the proposed **Redevelopment Project Area** under the requirements of the **Act** as a redevelopment project area. To start this process the municipality must pass a resolution calling for a **Feasibility Study**. The City of Carbondale's Resolution is Attachment II.

Since one of the purposes of the planned redevelopment project may reasonably be expected to result in the displacement of residents from 10 or more inhabited residential units and the proposed **Redevelopment Project Area** contains 75 or more inhabited residential units, this **Feasibility Study** must contain a Housing Impact Study "**Housing Impact Study**" as set forth in paragraph (5) of subsection (n) of 65 ILCS 5/11/74.4-3. The **City** has prepared such a study. It is Attachment III.

The **Act** states that the **Feasibility Study** "...means a preliminary report to assist a municipality to determine whether or not tax increment allocation financing is appropriate for effective redevelopment of a proposed redevelopment project area."

The **Consultant**, on behalf of the City of City of Carbondale, has undertaken a several analyses of possible development to ascertain whether the proceeds from the **TIF** would make the tax increment allocation appropriate for effective redevelopment of the proposed City of Carbondale Illinois-University Corridor Redevelopment Project Area #2. Based on the results of these analyses, the **City** can determine that the tax increment allocation financing is adequate for an effective redevelopment of the proposed City of Carbondale Illinois-University Corridor Redevelopment Project Area #2.

The proposed **Redevelopment Project Area** is the same identified in the interested registry proceedings published August 24, 2012.

The Redevelopment Plan will call for new development and redevelopment of commercial, residential, industrial, and mixed-use commercial/residential uses throughout the proposed **Redevelopment Project Area** consistent with the City's *Comprehensive Plan*. Improvement projects supported by the **Redevelopment Plan** include rehabilitation and reuse of existing sound residential and commercial buildings; redevelopment of obsolete industrial, commercial and residential buildings and sites; new residential development; new commercial and mixed-use development; refurbished existing and new parking facilities, and creation and enhancement of community facilities and amenities.

Based on this planned redevelopment programs the following is a preliminary analysis of the appropriateness of designating the proposed **Redevelopment Project Area** as a **TIF District**.

Full analysis of this designation will occur in the **Redevelopment Plan** and **Project** and the **Eligibility Study** for the proposed **Illinois-University Corridor Redevelopment Project Area #2**.

## Financial Analysis

Based on possible redevelopment, the **City** made the following assumptions regarding projects to be undertaken as part of the proposed Redevelopment Plan and Project:

### Redevelopment Project Costs and Expenses

The following set of Project Redevelopment Costs determines suggests cost related to the proposed **Redevelopment Project Area**:

(1)	Costs of studies, surveys, development of plans and specifications, implementation and administration (annual administrative costs shall not include general overhead or administrative costs of the municipality that would still have been incurred by the municipality if the municipality had not designated a <b>Redevelopment Project Area</b> or approved a <b>Redevelopment Plan</b> ) of the <b>Redevelopment Plan</b> including, but not limited to, staff and professional service costs for architectural, engineering, legal, financial, planning or other services.....	\$2,000,000
(2)	Costs of marketing sites within the <b>Redevelopment Project Area</b> to prospective businesses, developers, and investors .....	\$500,000
(3)	Property assembly costs, including, but not limited to, acquisition of land and other property, real or personal, or rights or interests herein, demolition of buildings, site preparation, site improvements that serve as an engineered barrier addressing ground level or below ground environmental contamination, including, but not limited to, parking lots and other concrete or asphalt barriers, and the clearing and grading of land.....	\$20,000,000
(4)	Costs of rehabilitation, reconstruction or repair or remodeling of existing public or private buildings, fixtures and leasehold improvements; and the cost of replacing an existing public building pursuant to the implementation of the <b>Redevelopment Project</b> , if the existing public building is to be demolished to use the site for private investment or devoted to a different use requiring private investments .....	\$20,000,000
(5)	Costs of the construction of public works or improvements, including any direct or indirect costs relating to Green Globes or LEED certified construction elements or constructions elements with an equivalent certification .....	\$10,000,000
(6)	Costs of job training and retraining projects, including the cost of "welfare to work" programs implemented by businesses located within the <b>Redevelopment Project Area</b> .....	\$ 1,000,000
(7)	Financing costs, including, but not limited to, all necessary and incidental expenses related to the issuance of obligations and which	\$10,000,000

	may include payment of interest on any obligations including interest accruing during the estimated period of construction of the <b>Redevelopment Project</b> for which such obligations are issued and for not exceeding 36 months thereafter and including reasonable reserves related thereto.....	
(8)	To the extent the <b>City</b> , by written agreement, accepts and approves the same, all or a portion of a taxing district's capital costs resulting from the <b>Redevelopment Project</b> necessarily incurred or to be incurred within a taxing district in furtherance of the objectives of the <b>Redevelopment Plan and Project</b> .....	\$5,000,000
(9)	Costs of job training, retraining, advanced vocational education or career education, including but not limited to courses in occupational, semi technical or technical fields leading directly to employment, incurred by one or more taxing districts, provided that such costs (i) are related to the establishment and maintenance of additional job training, advanced vocational education or career education programs for persons employed or to be employed by employers located in a <b>Redevelopment Project Area</b> ; and (ii) when incurred by a taxing district or taxing districts other than the municipality, are set forth in a written agreement by or among the municipality and the taxing district or taxing districts, which agreement describes the program to be undertaken, including, but not limited to, the number of employees to be trained, a description of the training and services to be provided, the number and type of positions available or to be available, itemized costs of the program and sources of funds to pay for the same, and the term of the agreement. Such costs include, specifically, the payment by community college districts of costs pursuant to Sections 3-37, 3-38, 3-40 and 3-40.1 of the Public Community College Act and by school districts of costs pursuant to Sections 10-22.20a and 10-23.3a of the School Code. ....	\$1,000,000
(10)	Interest cost incurred by a redeveloper related to the construction, renovation or rehabilitation of a <b>Redevelopment Project</b> limited to Per the <b>Act</b> .....	\$5,000,000
(11)	Per the <b>Act</b> up to 50% of the cost of construction of new housing units to be inhabited by low-income households and very low-income households as defined in Section 3 of the Illinois Affordable Housing Act. (Senior only).....	\$20,000,000
(12)	Contributions to Contiguous <b>TIF's</b> .....	\$10,000,000
(13)	Relocation costs to the extent that a municipality determines that relocation costs shall be paid or is required to make payment of relocation costs by Federal or State law or in order to satisfy subparagraph (7) of subsection (n) of Section 11-74.4-3 of the Act.....	\$2,000,000

(14)	Contributions to Schools required by the <b>Act</b> for an increased student population as a result of <b>TIF Redevelopment Projects</b> .....	\$1,000,000
(15)	Contributions to Libraries required by the <b>Act</b> for an increase in Library Patrons as a result of <b>TIF Redevelopment Projects</b>	\$1,000,000

An initial financial analysis indicates that the proposed City of Carbondale Illinois-University Corridor Redevelopment Project Area #2 could generate a total increment of \$28,357,999. The **City** can conclude based on this information that there will be an appropriate amount of revenue to finance some or all of the proposed **Redevelopment Project Area Costs** generated by the appropriate redevelopment of the proposed City of Carbondale, Illinois-University Corridor Redevelopment Project Area #2.

Attachment IV is a projection of this revenue and is made part of this report by reference hereto.

## **Housing Impact in the Proposed Redevelopment Project Area**

The **Housing Impact Study** was prepared in September and October 2012 and is made part of this report by reference hereto. The **Housing Impact Study** indicates that the proposed **Redevelopment Project Area** contains 89 inhabited all of which may be displaced.

The census data in the **Housing Impact Study** indicates that of all households residing within the U.S. Census Tracts encompassed by the proposed **Redevelopment Project Area**: 31% may be classified as extremely low-income, 50%; very low, 17%; low, 17%; and moderate, 6% income households. Therefore, approximately 90% of the households can be classified to be in the extremely low to moderate income level.

As a result of the above findings in the **Housing Impact Study**, the **City** has created a program to deal with the relocation of residents. This plan is found in the **Housing Impact Study** it includes the following:

### **Replacement Housing**

In accordance with Section 11- 74.4-3(n)(7) of the Act, the **City** shall make a good faith effort to insure that affordable replacement housing for any qualified displaced residents whose residence is removed as a result of the implementation **TIF** development activities is located in the City of City of Carbondale, preferably within the **TIF** District itself. Replacement housing within 2,500 feet of the proposed **Redevelopment Project Area** and in the **City** is detailed in the **Housing Impact Study**. Because of the small number of housing units in the proposed **Redevelopment Project Area** it may not be possible to relocate displaced residents in the proposed **Redevelopment Project Area** itself.

### **Type and Extent of Relocation Assistance**

In the event that the implementation of **TIF** development activities result in the removal of **TIF** area residential housing inhabited by low-income households or very low-income households, or the permanent displacement of low-income households or very low-income households from such residential housing units, such households shall be provided affordable housing and relocation assistance not less than that which would be provided under the federal Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 as amended and the related regulations issued under this Act including the eligibility criteria. Affordable housing may be either existing or newly constructed housing. The **City** shall make a good faith effort to insure that affordable replacement housing for the aforementioned households is located in the City of City of Carbondale, where possible within or near the proposed **Redevelopment Project Area**.

Based on the **Housing Impact Study**, the **City** determines that appropriate measures can be taken in the proposed **Redevelopment Project Area** for the removal and relocation of residents impacted by the removal of residences from the proposed **Redevelopment Project Area**.

**TIF** or other available funds will be used for these relocations costs.

## Use of Incentives

The **City** examined current redevelopment in the proposed **Redevelopment Project Area** and compared it to other areas in the **City** to determine if use of **Tax Increment Financing** is appropriate in the proposed **Redevelopment Project Area** to effectuate redevelopment. The following is their findings:

The **Vacant Land** in the proposed **Redevelopment Project Area** has seen minimal development within the last five years. There are excessive vacancies. Much of the vacant land is railroad right of way.

The Equalized Assessed Valuation (“**EAV**”) of the **Improved Land** decreased three of last five years.

The **City** has pursued developers, but without development incentives, has been unable to attract developers to the proposed **Redevelopment Project Area**. The obsolete and deteriorated nature of the industrial, commercial, and residential properties have resulted in little development in these areas as compared to other projects in the Enterprise Zone **and TIF #1** which is approximately one half mile from the possible **Redevelopment Project Area** .

Some buildings must now be demolished and redeveloped to code standards. Many buildings can be rehabilitated and redeveloped to meet code standards.

Property throughout the proposed **Redevelopment Project Area** lacks adequate drainage, making development cost prohibitive.

This compares to the \$ 21,655,000 of development in the **TIF #1** which is approximately one half mile from the possible **Redevelopment Project Area** and the Enterprise Zones which have been able to address some of these factors.

The proposed **Redevelopment Project Area** as a whole is adversely impacted by the presence of **Blighted Area** factors and these factors are reasonably distributed throughout the proposed **Redevelopment Project Area**. These factors go beyond normal development needs and **TIF** funds will be necessary to finance redevelopment activities.

The **Vacant Land** will need all public improvements in order to develop. **Improved Land** will also need public improvements. Drainage especially needs to be addressed in both the **Improved** and **Vacant Land**.

Some building will need to be demolished as they do not meet modern day standards. Where possible code compliance will need to be addressed making the expense of redevelopment well beyond normal. EPA remediation will need to be addressed on EPA identified properties and there will be extraordinary costs for the parcels requiring remediation in the **Redevelopment Project Area**. **TIF** funds will be needed to meet the above challenges for development and redevelopment in the **Redevelopment Project Area**.

Based on the above information, the **City** determines that it is appropriate to provide assistance for the purposed of redevelopment of the proposed **Redevelopment Project Area**.

## Qualification

The following is an analysis as to whether it is likely the proposed **Redevelopment Project Area** would qualify as a **TIF**.

### **Blighted Area**

The proposed **Redevelopment Project Area** meets the requirements of the **Act** for designation of both **Improved Land** and **Vacant Land** as a **Blighted Area**.

### Improved Land

The proposed **Redevelopment Project Area** meets the requirements of Section 11-74.4-3 (a) (1), (B), (C), (D), (H), (J), (L), and (M) of the **Act** for designation of **Improved Land** as a **Blighted Area**.

For designation as a **Blighted Area** for **Improved Land**, five or more of thirteen factors must be met.

The following seven factors are present in the **Improved Land**:

- Obsolescence
- Deterioration
- Below Minimum Code
- Inadequate Utilities
- Deleterious Land Use or Layout
- Community Planning
- EAV Rate of Increase less than the Remainder of the **City**

### Vacant Land

The proposed **Redevelopment Project Area** also meets the requirements of the **Act** for designation of **Vacant Land** as a **Blighted Area**. For designation as a **Blighted Area** for **Vacant Land**, there are two sections under which **Vacant Land** can be determined to be blighted. One of the two sections must be met in order for a **Redevelopment Project Area** to qualify as blighted for **Vacant Land**. The meeting of two or more of the factors in one section is required. In the other section, the meeting of one or more of the factors is required. Requirements of one section are met.

The proposed **Redevelopment Project Area** meets the requirements of Section 11-74.4-3(a) (2) (A) and (D) of the **Act**. In this section of the **Act**, two factors are required for designation of **Vacant Land** as a **Blighted Area**. The following two factors are present in the vacant area:

- Obsolete Platting
- Deterioration of structures or site improvements in neighboring or adjacent areas

The proposed **Redevelopment Project Area** does meet the requirements of Section 11-74.4-3(a) (3) (B) of the **Act**. In this section of the **Act**, one factor is required for designation of **Vacant Land** as a **Blighted Area**. One factor is present in the **Vacant Land**.

- Abandoned Rail Road Right of Way or Tracks

The **Vacant Land** meets the definition of **Vacant Land** under the **Act** in Section 11-74.4-3 (v). The **Vacant Land** has not been “commercially farmed” in the last five years. The land lacks industrial, commercial or residential structures or improvements.

#### **Analysis of Factors Presence and Distribution**

There must be a reasonable presence of and distribution of these factors in the proposed **Redevelopment Project Area**, as stated in the **Act**. The factors presented are reasonably present and distributed in the **Improved Land** and **Vacant Land** in the proposed **Redevelopment Project Area**.

#### **Analysis of Size Requirements**

The proposed **Redevelopment Project Area** includes approximately 134 acres, in excess of the minimum 1½ acres required by the **Act**.

Based on a review of the qualifications to for designation as **Blighted**, the proposed **Redevelopment Project Area** appears to qualify for this designation. The above findings Table 2, Rating Survey for Improved Land support this determination.
